

Award-winning Commercial Credit & Collections Software

Cortera's eCredit[®] platform supports the critical process of granting credit, monitoring portfolio risk, and collecting accounts receivable.

Credit Management Solution

Sophisticated global credit management requires a comprehensive solution. From the initial processing of credit applications to the monitoring of customer portfolios, eCredit[®] provides the depth of functionality that complex credit operations require.

- Multi-user workflow automation
- Customized credit scoring automation
- Complex business hierarchy capabilities
- Seamless integration with back-office systems
- Integration with global data and analytics providers
- Insightful portfolio monitoring and scoring
- Flexible performance reporting
- Capable of managing multiple currencies

Collections Management Solution

Cortera's eCredit[®] software propels the order-to-cash cycle and automates time-consuming manual tasks. eCredit makes it easy for collections professionals to identify and manage troublesome accounts early, resulting in overall reductions in their company's bad debt.

- Document and manage disputes
- Track promises to pay
- Organize collection activity history and notes
- Design and manage champion/challenger collection strategies
- Prioritize and queue a collector's daily tasks
- View, manage, and report key performance indicators through dashboards
- Segment customers to perform trend analysis and customize workflow rules

Industry Experience

Developed and refined over our 20+ year history, Cortera's B2B credit and collections solutions are used by thousands of finance professionals worldwide.

Innovative Solutions

Cortera leverages its market-leading information and years of expertise in the credit and collections industry to help companies successfully manage risk, drive revenue, and lower DSO and bad debt.

High Value

Why eCredit?

Increase Operational Efficiency:

Critical workflow management tools streamline credit management activities and enable greater analyst productivity.

Customized Decision-making:

Credit managers can create custom scorecards using data from multiple bureaus to automate their own unique credit policies and A/R processes, reducing costly manual intervention and improving decision consistency and quality.

Stay Organized With A Centralized Customer File:

Store all customer data—including credit reports, financial statements, trade and bank references—in a single repository. Quickly and easily view the info you need in an easy to read format.
